## ASSIGNMENT

Whereas, Seagull Technology ("Assignor"), a corporation organized and existing under the laws of California and residing at 1700 Dell Avenue, Campbell, California 95008, is the sole and exclusive owner of U.S. Patent Application Serial No. 10/431,163, filed May 6, 2003, by virtue of an Assignment from the inventors recorded in the U.S. Patent and Trademark Office on May 6, 2003, at Reel 014057, Frame 0772, and U.S. Patent Application Serial No. 10/788,898, filed February 26, 2004, by virtue of an Assignment from the inventors recorded in the U.S. Patent and Trademark Office on July 29, 2004, at Reel 014924, Frame 0537;

Whereas, Sensis Corporation ("Assignee"), a corporation organized and existing under the laws of Delaware and residing at 5793 Widewaters Parkway, Dewitt, New York 13214, is desirous of acquiring the entire right, title and interest in, to and under U.S. Patent Application Serial Nos. 10/431,163 and 10/788,898, and any letters patents which may be granted thereon, and any and all letters patents that may be obtained by the Assignee through any continuations, divisions, or continuations-in-part thereof, as well as any letters patents that may result from any reissues or re-examinations thereof, and all other rights in the United States to the inventions covered thereby;

Now, therefore, for One Dollar (\$1.00) and other good and valuable consideration, the receipt and adequacy of which is hereby acknowledged by both parties, the Assignor hereby sells, assigns and transfers to the Assignee the entire right, title and interest in, to and under U.S. Patent Application Serial Nos. 10/431,163 and 10/788,898, and any letters patents which may be granted thereon, and any and all letters patents that may be obtained by the Assignee through any continuations, divisions, or continuations-in-part thereof, as well as any letters patents that may result from any reissues or re-examinations thereof, the same to be held by the Assignee and/or any of its successors, assigns or other legal representative, to the end of the term or terms for which said letters patents of the United States are or may be granted or reissued as fully entirely as the same would have been held by the said Assignor if this assignment, sale and transfer had

not been made, together with all claims for damages by reason of any past infringements, with the right to sue for, and collect the same.

Assignor hereby covenants that no assignment, sale, agreement or encumbrance has been or will be made or entered into which would conflict with this Assignment.

Assignor further covenants that Assignee will, upon its request, be provided promptly with all pertinent facts and documents relating to U.S. Patent Application Serial Nos. 10/431,163 and 10/788,898, and the inventions disclosed and claimed therein as may be known and accessible to Assignor and will testify as to the same in any interference, litigation or proceeding related thereto and will promptly execute and deliver to Assignee or its legal representatives any and all papers, instruments or affidavits required to apply for, obtain, maintain, issue and/or enforce any patents granted on U.S. Patent Application Serial Nos. 10/431,163 and 10/788,898 or any continuations, divisions, continuations-in-part, reissues or re-examinations thereof, and any letters patents that may result therefrom, which may be necessary or desirable to carry out the purposes thereof.
